ESG Solutions (IoW) Ltd

Environmental Policy Statement

Context

ESG Solutions (IoW) Ltd is a sustainability consultancy based on the Isle of Wight in the United Kingdom. We are a husband-and-wife micro business working from home and currently have clients located in the south of England. The majority of our services are provided remotely but we attend client premises as and when required.

The Isle of Wight is an Area of Outstanding Natural Beauty and was designated a UNESCO World Biosphere Reserve in 2019, however our island location poses challenges both for travel to the mainland and for the procurement of goods. Other pressing issues which will impact on our environmental performance include water shortage, increasing energy prices, and a lack of alternative to landfill for the disposal of general waste.

Scope

This Policy applies to all business activities undertaken by ESG Solutions (IoW) Ltd within the United Kingdom.

Commitments

ESG Solutions (IoW) Ltd is committed to:

- The protection of the environment (including the prevention of pollution).
- Meeting our compliance obligations.
- Continual improvement of both our environmental performance and this environmental management system.
- Achieving Net Zero by 2040
- Supporting the Isle of Wight Biosphere Reserve status

We will develop our environmental management system to align with BS EN ISO 14001:2015 through understanding our environmental aspects, compliance obligations and environmental risks and opportunities. We will use these to set environmental objectives and we will develop our environmental programme to achieve these.

This policy will be reviewed annually or when the Context or Scope of this policy is subject to significant change.
